Weekly Rainfall Forecast for 14th February -13th March 2025

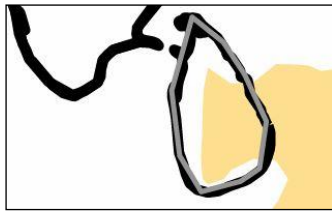

Issued on 13th February 2025 by Seasonal Forecasting Division of the Department of Meteorology, Sri Lanka.

Weekly Rainfall anomaly

Source – NCMRWF Extended Range Forecasts: 20250213

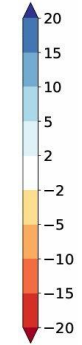

Updated on 13th February 2025

14 - 20 Feb 2025

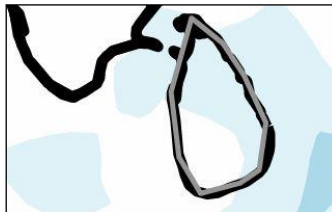

Below normal rainfall are likely over Eastern, Uva, Sabaragamuwa, Central, and North-Central Provinces and near normal rainfalls are likely over remaining areas.

21-27 Feb 2025

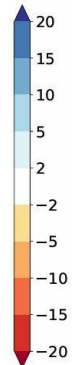

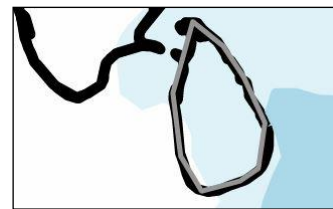

Near normal rainfalls are likely over most part of the country. However, slightly above normal rainfalls are likely in Ampara and Batticaloa districts.

28 Feb - 06 Mar 2025

Slightly above normal rainfalls are likely over most parts of the country except in some parts of Central, Sabaragamuwa, Western and Southern provinces where near normal rainfalls are likely.

07-13 Mar 2025

Slightly above normal rainfalls are expected over most parts of the country.
